Is guide me

1. Apna Mac pehchano (Apple Silicon ya Intel)
2. Sahi file download karo
3. Applications folder me daalo
4. Pehli baar kholna
5. "Open Anyway" - sirf ek baar
6. Licence activate karo
7. Live data jodo (Indian broker, Gold, Crypto)
8. MT5 Bridge (apne MT5 broker ka data)
9. Taiyaar! Update kaise aata hai
10. Dikkat aaye to

Is guide me **"Asli screen"** likhi tasveerein CandleForge ki asli screens hain. **"Chitra"** likhi tasveerein Mac ki screens samjhane ke liye banayi gayi hain - aapke Mac par rang ya shabd thode alag dikh sakte hain, steps wahi rahenge.

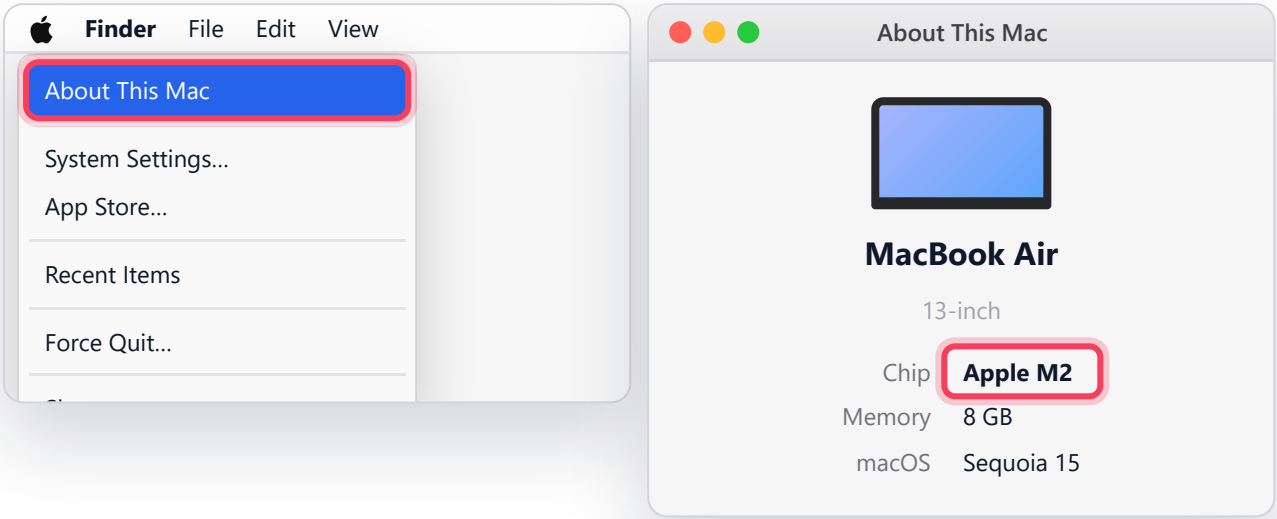

CandleForge abhi Apple se "signed" nahi hai, isliye Mac pehli baar kholne par rokta hai. Ye normal hai - step 4 aur 5 se ek baar khol do, phir hamesha seedha khulega.

1 Apna Mac pehchano

Find out which chip your Mac has.

Screen ke upar-baayen **Apple logo** dabao → **About This Mac**. Wahan:

- **Chip: Apple M1 / M2 / M3 / M4** likha ho → aapka Mac **Apple Silicon** hai (2021 ke baad ke lagbhag sab Mac).
- **Processor: Intel** likha ho → aapka Mac **Intel** hai (purane Mac).

Chitra (samjhane ke liye) · Apple logo → About This Mac → "Chip" ki line dekho

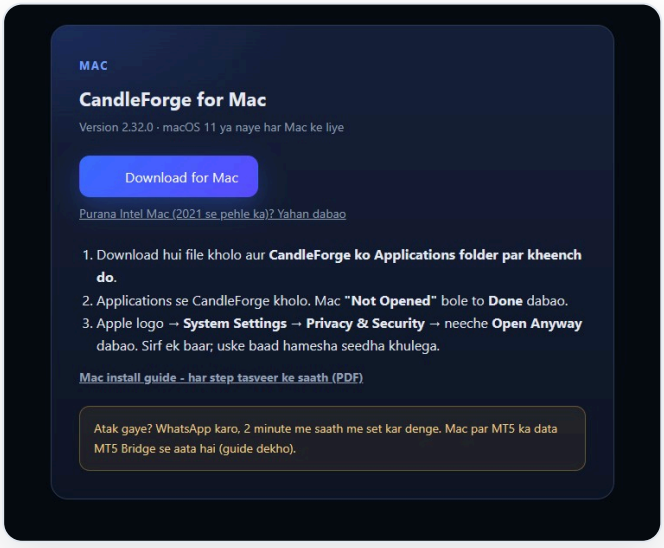

2 Sahi file download karo

Download the right file from candleforge.in.

candleforge.in kholo → **Download** section → Mac wale box me:

- Apple Silicon: **Download for Mac** dabao.
- Intel: **"Purana Intel Mac? Yahan dabao"** dabao.

File **Downloads** folder me aayegi, naam jaisa: `CandleForge-v2.32.0-Mac-Apple-Silicon.dmg` . Isi box me **"Mac install guide (PDF)"** - yahi guide.

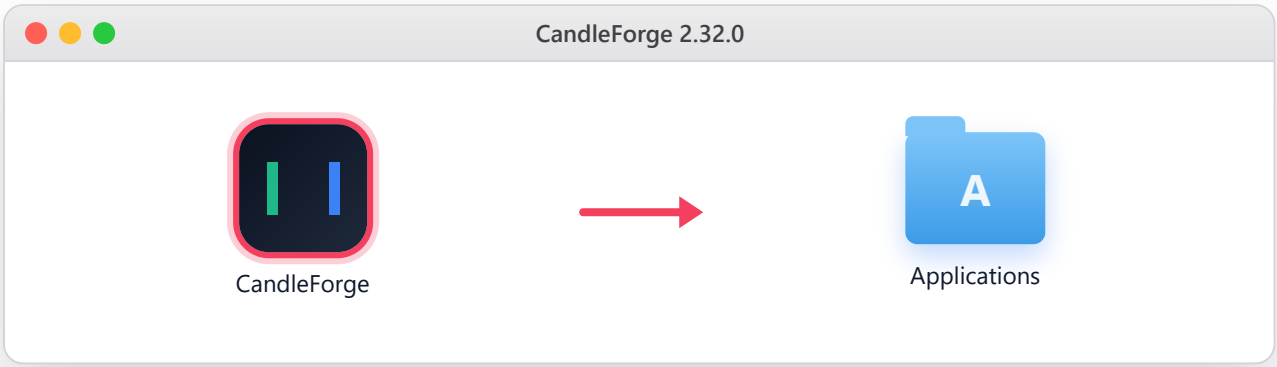

Asli screen · candleforge.in par Mac ka download box

3 Applications folder me daalo

Open the .dmg and drag CandleForge onto Applications.

Downloads me **.dmg** file par double-click karo. Ek window khulegi - **CandleForge** ke icon ko pakad kar **Applications** folder par chhod do. Copy hone do (kuch second).

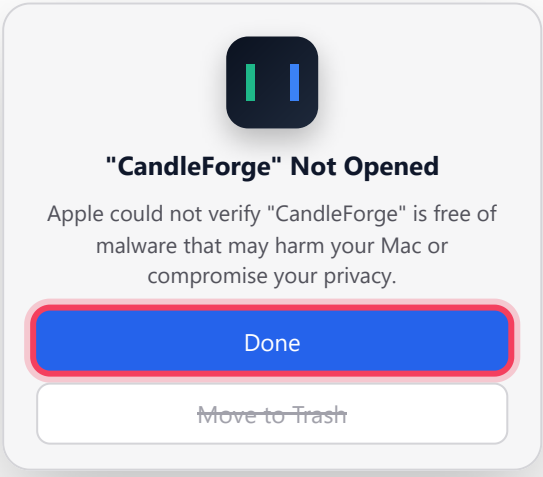

Chitra (samjhane ke liye) · CandleForge ko teer ki disha me Applications par kheencho

> Pehle se purana CandleForge hai? Mac "Replace" puchhe to **Replace** dabao - aapki settings, licence aur charts safe rehte hain.

4 Pehli baar kholna

The first open: macOS stops it once. Press Done.

Finder → **Applications** → **CandleForge** par double-click. Mac ek message dikhayega ki ise check nahi kar paya. **Done** dabao. (**Move to Trash NAHI** dabana.)

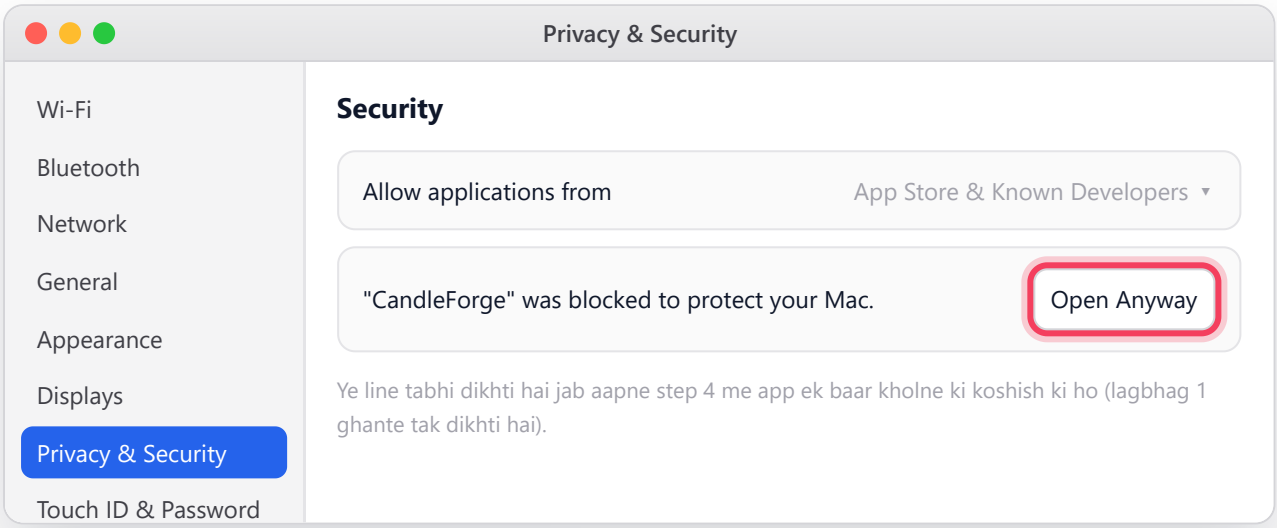

Chitra (samjhane ke liye) · macOS 15 (Sequoia) ka message. Purane macOS par "can't be opened because Apple cannot check it" - wahan **OK** dabao

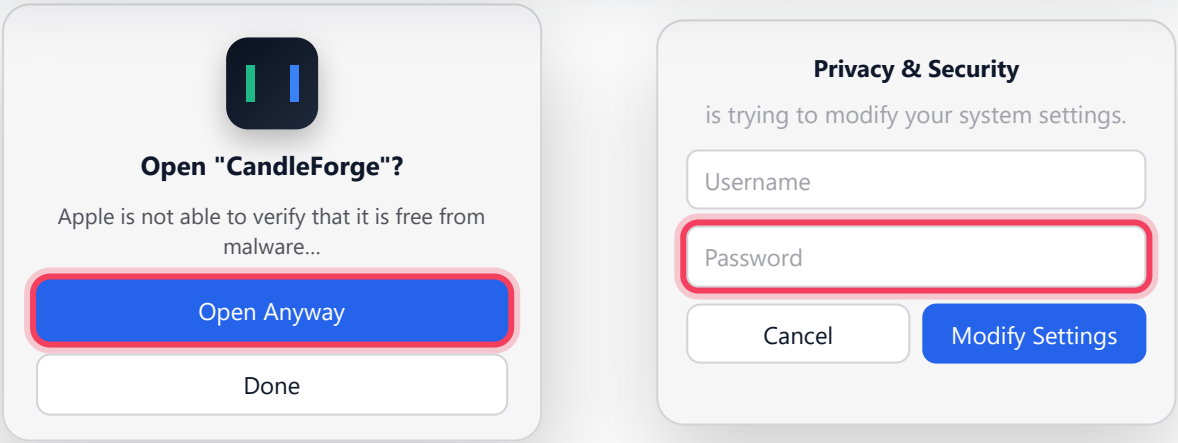

5 "Open Anyway" - sirf ek baar

System Settings → Privacy & Security → Open Anyway.

1. **Apple logo → System Settings** kholo.
2. Baayen list me **Privacy & Security** chuno.
3. Neeche scroll karo - **"CandleForge" was blocked to protect your Mac.** ke saamne **Open Anyway** dabao.
4. Ek aur box aayega - phir se **Open Anyway**, aur apna **Mac password** (ya Touch ID) daalo.

Chitra (samjhane ke liye) · System Settings → Privacy & Security → neeche Open Anyway

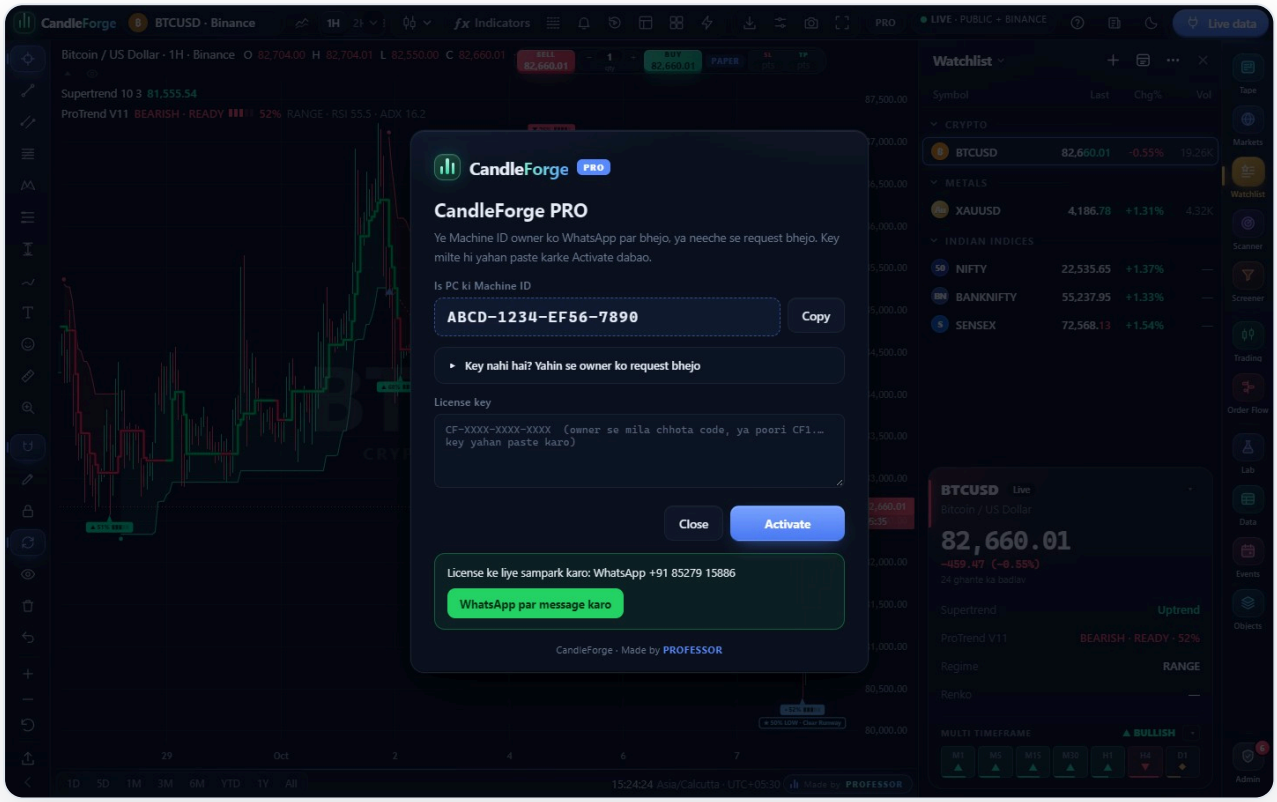

Chitra (samjhane ke liye) · Phir se Open Anyway, phir Mac ka password - bas

macOS 14 ya purana? Aasaan tareeka: Applications me CandleForge par **right-click (Control + click) → Open → Open**.

6 Licence activate karo

Copy your Machine ID, get your key, paste it, press Activate.

1. CandleForge khulte hi licence screen aati hai. **Machine ID** ke saamne **Copy** dabao.
2. Machine ID owner ko **WhatsApp** par bhejo (ya "Key nahi hai? Yahin se request bhejo" se form bhejo).
3. Key / chhota code milte hi **License key** box me paste karo → **Activate**.

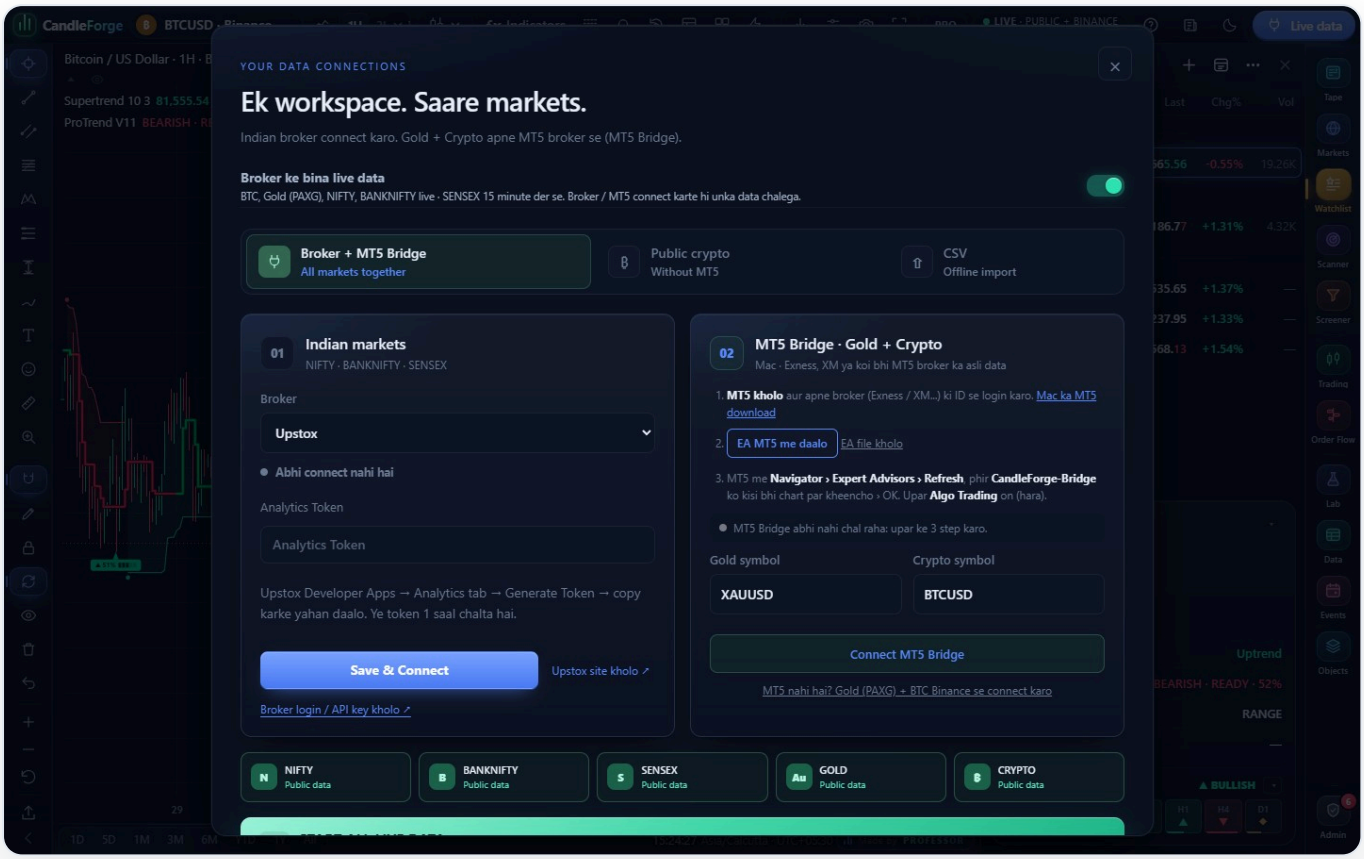

Asli screen · Licence screen (Machine ID yahan sirf namoona hai - aapki apni alag hogi)

7 Live data jodo

Connect live data: crypto and gold work at once; add your Indian broker.

- **BTC, Gold (PAXG), NIFTY, BANKNIFTY** bina broker ke turant live (SENSEX 15 minute der se).
- Upar **Live data** dabao → **Indian markets** me apna broker (Dhan, Upstox...) chuno, token daalo → **Save & Connect**.
- Gold / Forex apne MT5 broker ke asli price par chahiye → agla step (MT5 Bridge).

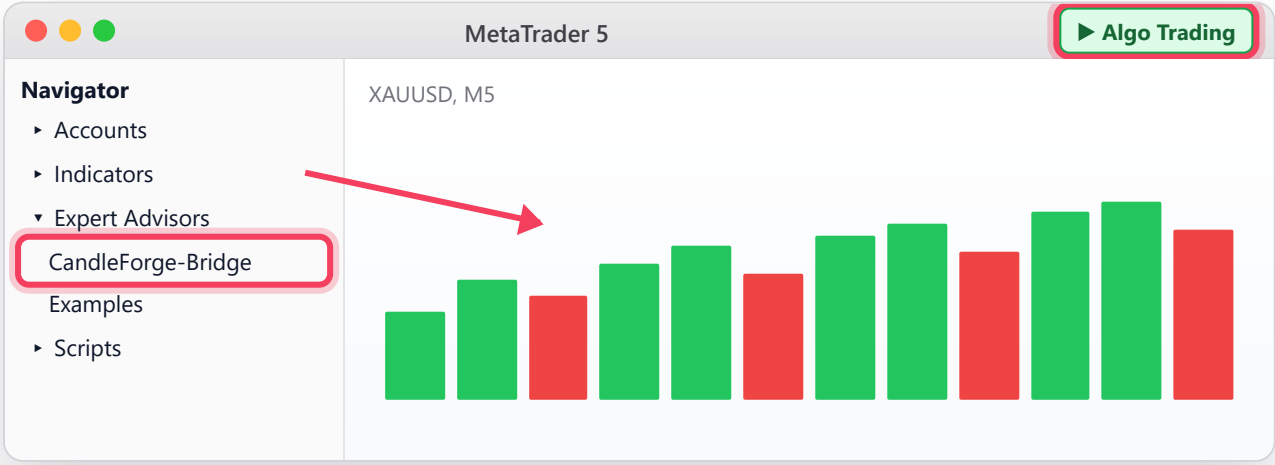

Asli screen · Mac par "Live data": baayen Indian broker, daayen MT5 Bridge

8 MT5 Bridge - apne MT5 broker ka data (optional)

Gold / forex from your own MT5 broker through the CandleForge-Bridge EA.

1. Mac ke liye **MetaTrader 5** install karo (metatrader5.com) aur apne broker (Exness, XM...) ki ID se login karo.
2. CandleForge → **Live data** → MT5 Bridge card me **"EA MT5 me daalo"** dabao.
3. MT5 me **Navigator** → **Expert Advisors** → **Refresh**, phir **CandleForge-Bridge** ko kisi bhi chart par kheencho → **OK**.
4. MT5 ke upar **Algo Trading** on karo (hara).
5. CandleForge me **Connect MT5 Bridge** dabao. Status hara ho jayega.

Chitra (samjhane ke liye) · Navigator se CandleForge-Bridge ko chart par kheencho, upar Algo Trading hara

MT5 nahi hai? Koi baat nahi - Gold (PAXG) aur BTC Binance se apne aap chalte hain ("MT5 nahi hai?" link).

9 Taiyaar!

You are set. Updates arrive inside the app.

Asli screen · CandleForge chalu - chart, watchlist, ProTrend

Naya version aane par CandleForge khud batata hai - **Update** dabao, app apne aap naya ho jayega.

10 Dikkat aaye to

If something goes wrong.

- **"Open Anyway" button nahi dikh raha:** pehle step 4 karo (app ek baar kholne ki koshish), phir Privacy & Security dobara kholo.
- **"CandleForge is damaged and can't be opened": Terminal** kholo (⌘ + **Space** → "Terminal") aur ye line paste karke **Enter** dabao, phir app kholo:

```
Terminal
~ % xattr -cr /Applications/CandleForge.app
```

- **"ProTrend server se connect nahi ho paya":** internet check karo; office / VPN ka firewall ho to band karke dekho.
- **Kuch aur:** WhatsApp **+91 85279 15886** - 2 minute me saath me set kar denge.
